Basic web development skills: HTML, CSS and JS.
Strong analytical and problem-solving skills.

ADDITIONAL ACTIVITIES

Head of the Section of Geomatics of the Scientific Association of Foresters at WULS Warsaw (2020-2023).

the Laureate of National Geomatics Conference, Poznań 2021.

PROFILE

A forestry student with a field of interest located around GIS and Remote Sensing. I am looking forward job and internship offers, whose can be influential in the future, both in my domestic market and abroad.

WORK EXPERIENCE

Project Member
iFOS Gmbh , 2023-present

Member of several publicly financed projects e.g. SmartForestry, CO24it.
I prepared a machine learning database, digitized features, processed UAV data, prepared documentation and more.

Intern

OPEGIEKA - 2 months (2023)

Completed internship as part of the esteemed POWER3 program, exclusively designed for students. Focus of the internship centered on acquiring basic skills in Python programming language and its practical application in Geographic Information Systems (GIS).

Intern

Taxus UL - 4 months (2022)

Intern at the Greenery Inventory Laboratory in the R&D Department.
The company realizes Forestry projects related to field surveys and preparing documentation for private and state clients,, mainly basing on implementing geomatics at their work.
